## WHO WE ARE

Health councils were created in 1983 by Florida Statute to identify, address and resolve health care issues of local concern. There are 11 health councils in Florida. Each health council is a private, non-profit organization governed by a Board of Directors. The Board members are appointed by County Commissioners to represent the concerns of health care consumers, providers and purchasers.

The Health Council of West Central Florida, Inc. (HCWCF) serves Hardee, Highlands, Hillsborough, Manatee and Polk counties. The Council has extensive experience working with for-profit and non-profit agencies, public health organizations, consumers and professionals. Collaboration and cooperation are critical to the success of our mission.

We have three strategic goals: (1) influence the accessibility of health care and social support systems through *comprehensive health planning*; (2) provide *education* about essential community health challenges and solutions; and (3) participate as a collaborative partner to address current and emerging health issues to develop and sustain efficient and cost effective *service delivery* systems.

## COMMUNITY-BASED MEDICAL RESOURCES

The following is a list of resources that are available to help with medical needs and includes Federally Qualified Health Centers (also know as community health centers), free clinics, mobile clinics and We Care programs. While not typical, some County Health Departments provide primary care or work in conjunction with community health centers to provide primary care service and those have been included.

Federally Qualified Health Centers can serve as a medical home and provide primary care. In some cases, dental and limited specialty care is available. Services are provided on a sliding fee scale.

Free Clinics and mobile clinics are generally not designed to be medical homes but provide care for emergent issues and linkages to on-going care.

We Care programs provide limited specialty care dependent upon volunteer services of physicians.
